

Ketosteril® Research Award 2012

Grant: 100,000 Euro

Research creates progress

Fresenius Kabi announces a Ketosteril® Research Award and invites investigators to apply for this grant of 100,000 Euro.

The grant covers applied research on topics directly related to the field of the therapeutic relevance of keto/amino acids and protein restriction in the scope of chronic kidney disease (CKD).

A selection committee consisting of established investigators will select the award recipient. The winner of this research grant will be officially announced at the occasion of the XVI International Congress on Nutrition and Metabolism in Renal Disease in Honolulu, Hawaii, June 26-30, 2012.
